+ Add

Make sure you set up your recurring payment in an amount equal to or greater than your required monthly loan payment. Partial payments may be made, but will not satisfy your full payment due unless multiple partial payments made in a monthly period to satisfy the full payment amount due on or before the due date. For example, you may make bi-monthly payments of half the required monthly payment amount so the required monthly payment is made each month. Payments in excess of the monthly required payment will be applied to the next payment due date and may NOT be applied to principal only. To make principal only payments, contact your local branch.

Automatic payments have not been set up.

You have the following options:

- Enter any amount you want to pay.
- Choose a weekly, semi-monthly, monthly, or annual payment schedule.

To get started, click the "Add" button above. You can create multiple automatic payment schedules.

If you clicked on "Manage", this screen will come up. You will click "+Add".
